KART AND RACE – MONTICHIARI (BS), 14th-15th-16th JANUARY 2011

"KART AND RACE" HAS THE SUPPORT OF THE FIRST IMPORTANT PARTICIPANTS. THE FAIR IS DUE FROM NEXT 14th TO 16th JANUARY 2011 IN MONTICHIARI

AMONG THE CONSTRUCTORS, CRG CONFIRMED ITS PRESENCE WITH ALL ITS PROCUTION AND SOME NOVELTIES. OTHER IMPORTANT PROTAGONISTS OF KARTING READY TO JOIN

Montichiari (Bs - Italy). The third edition of "KART and Race" has received the first important support by several important protagonists of the world of karting. "KART and Race" is the important fair organized by Montichiari Exhibition Centre and due from 14th to 16th January 2011. Among the major constructor, CRG Group's participation has just been confirmed. CRG, on that occasion, is presenting all its production of chassis and of Maxter engines, besides an important space dedicated to the Rotax Trophy Italia.

Among CRG's novelties - expressly on the occasion of **"KART and Race"** - besides the renowned and winners of several prizes KF and KZ chassis, two new junior categories with the brand new chassis Micro and Mini powered by Rotax will be presented, as well as the a new series of karts for rental.

As for the two junior categories, they will have two identical CRG chassis with some solutions for a better adaptability, while the engines are the Rotax Max FR 125 "Micro Max" - just a bit less powerful (6,8 hp) - for children from 7 to 9 years of age, and "Mini Max" (12,8 hp) for children from 9 to 12 years of age.

"CRG has been one of the first companies to believe in the potentialities of this kart fair of Montichiari – says Giancarlo Tinini, Chairman of CRG spa – *and we will keep on supporting it in order to make of the Fair one of the top events of the sector. During the Fair, we are presenting our wide range of CRG products and Maxter engines, with the new karts for rental, the new Rotax line and the new karts for children powered by Rotax. What makes these children's kart engines special is the guarantee that they can last long, up to two years putting races and trials together, which is more or less equivalent to 1000 litres of petrol, without any kind of overhauling. Weather permitting, in Montichiari we will take some karts powered by Rotax Max and the karts for rental to show their potentialities on the area in front of the Exhibition Centre."*

Anyway, fans are looking at **"KART and Race"** with growing interest. Besides the companies that represent the constructors of chassis and engines, in the Fair there will be as well the massive presence of other sectors of karting, including the world of accessories, of the technical and sports gear and other important realities such as that of the kart tracks. In this sense the first to join the Fair was the **International Circuit of Siena**, which has confirmed its presence with a stand to present its events for the 2011 sports season and its promotional activities.
